AIA Continuing Education Opportunity

Program title:

Optimizing performance in commercial fenestration

Length: 1 hour | Live presentation

Learning Units: 1 AIA CES (LU/HSW) Learning Unit, Health, Safety, and Welfare

Course description:

1. Discuss the importance of optimizing energy efficiency in commercial buildings and initiatives to reduce energy consumption.
2. Evaluate the performance of aluminum window, storefront, and curtain wall fenestration systems in the building envelope through the application of structural thermal barriers and high-performance glazing.
3. Investigate performance and comfort-related topics in aluminum fenestration systems including material sustainability, thermal and structural performance, noise abatement and condensation resistance.
4. Observe a range of fenestration product types, measured performance outcomes, energy-savings, LEED, PassiveHouse and Cradle to CradleSM contribution through the use of multiple case studies.

Presenter contact information:

Jerry Schwabauer: VP Sales and Marketing – jschwabauer@azonusa.com

Jeff Lurges: Business Development Representative – jlurges@azonusa.com

Don Wright: Business Development Representative - dwright@azonusa.com

Patrick Muessig: VP of Global Technical Operations – pmuessig@azonusa.com

Provider number: K452 | **Course number:** AZON02

Distance learning – two options:

AEC Daily [Optimizing performance in commercial fenestration - online course](#)

BD+C University [Optimizing performance in commercial fenestration - online course](#)
